SUMMARY

Senior Software Engineer with 4 years of experience building full-stack and AI-driven applications using React, Next.js, Python, Node.js, Nest.js, Express.js, and modern cloud technologies. Experienced in RAG architectures, agentic AI, LLM integrations, microservices, data pipelines, and GraphQL/REST APIs. Skilled in translating business requirements into production-ready solutions, rapidly adapting to new technology stacks, collaborating with clients and engineering teams, and troubleshooting complex systems across the full stack.

EXPERIENCE

Senior Software Engineer

Wanile Technologies

July 2024 - Present, Lahore

- Led full-stack development across **8+ projects**, translating client requirements into scalable solutions using React, Next.js, Node.js, Nest.js, Express.js, and Python, accelerating delivery by **20%**.
- Built **30+ REST APIs**, database integrations, and data pipelines, improving response times by **18%**.
- Developed **10+ production-ready web applications** with secure authentication and integrations, reducing load times by **15%**.
- Resolved **50+ production issues** across frontend, backend, and infrastructure, reducing recurring incidents by **25%**.

Senior Software Engineer

Nazadv

November 2022 - February 2026, US-California

- Collaborated with **10+ clients/stakeholders** and **3-4 developers** to translate business requirements into full-stack solutions, accelerating delivery by **20%**.
- Built **15+ full-stack features** using React.js, Next.js, TypeScript, Python, Node.js, and Express.js across UI, APIs, databases, and data pipelines.
- Developed **5+ RAG/agentic AI solutions**, integrating LLMs into production applications and backend infrastructure.
- Prototyped and productionized **20+ features**, troubleshooting frontend, backend, data, and AI issues while reducing bugs by **25%**.

PROJECT

Carder (Digital Business Card Platform)

[carder.app](#)

- Collaborated with a large team on Next.js, TypeScript, Node.js, Express.js, SQL, Stripe, AWS S3, and cloud infrastructure.
- Managed backend, database migrations, deployments, and production operations for 150+ users across the Middle East and Europe, increasing adoption by 40%.
- Supported CI/CD pipelines, AWS deployments, environment configuration, monitoring, and production troubleshooting to ensure reliable releases and system availability.

Golegal (SaaS for Legal Assistance)

[golegal.wanile.dev](#)

- Built a full-stack AI platform using **Nest.js, Next.js, React, PostgreSQL, OpenAI, Agentic AI, Redux, React Flow, and Plate.js**, translating business requirements into production-ready solutions.
- Implemented **RAG pipelines, data workflows, and agentic AI orchestration** for context-aware legal automation and intelligent task execution.
- Designed and productionized AI-driven workflows, reducing manual document processing by **30%** for **50+ users**.
- Developed document-processing pipelines handling **100+ legal files/month** with **95% accuracy**, including Word-to-rich-text conversion and metadata preservation.
- Rapidly prototyped and iterated on AI features based on user feedback, improving document handling and contextual AI suggestions.

Muterpe (AI Image Generation SaaS)

- Built a full-stack AI model-training platform using Next.js, React, PostgreSQL, OpenAI, Agentic AI, Redux, Fal.ai, and AWS S3.
- Developed AI/data processing pipelines and API integrations for model training, image generation, and product customization, handling 100+ daily uploads.
- Productionized AI workflows and optimized cloud-based processing, achieving 99% uptime and 40% faster image generation.
- Built and shipped monetized AI features used by 200+ real users, generating \$5K+ revenue.

Alfa (Fintech)

WWS • [dev-v1.d1z2nmh3afnzze.amplifyapp.com](#)

- Building a microservices-based fintech platform with Python, Next.js, and GraphQL, supporting 6+ financial services and transaction workflows.
- Developing 6+ core features including internal/external transfers, bill splitting, account top-ups, currency conversions, and recurring payments.
- Designing 10+ GraphQL APIs and Python microservices for secure transaction processing, financial data management, and service-to-service communication.

• Collaborating across frontend and backend teams to prototype and productionize 10+ financial features, with additional capabilities currently under development.

EDUCATION

Bachelor of Computer Science

Pakistan Institute of Engineering and Applied Sciences • Islamabad

SKILLS

Core Technologies: JavaScript • Python • TypeScript • React.js • Next.js • Nest.js • Node.js • Express.js • LangChain • Agentic RAG • REST APIs • NextAuth • Redux Toolkit • TanStack Query • Tailwind CSS • GSAP • Framer Motion • MUI • Shadcn • Headless UI
